

Email Writing Topics

1. Professional email structure (subject, greeting, body, closing, signature)

Subject Line

Explain:

- Must be clear
- Short
- Related to content

 Good:

Subject: Bug in Login Module – Urgent

 Bad:

Subject: Hi

Greeting

 Good:

- Hi Team,
- Dear Sir/Madam,
- Hello [Name],

 Bad:

- Hi bro
 - Hey dude
-

Body

- Why you are writing
- What is the issue/request
- What action needed

Short sentences only.

4 Closing

Examples:

- Thank you.
 - Looking forward to your response.
 - Kindly do the needful.
-

5 Signature

Name

Role

Contact details

◆ Key: Clear, short, polite.

2. Writing clear and concise technical explanations

Example – Bug Report Email

Subject: Issue in Payment Gateway Integration

Hi Team,

While testing the payment module, we are facing an error during transaction processing.

Error Code: 502

Steps to reproduce:

1. Login
2. Add item to cart
3. Proceed to payment

Kindly check and resolve this issue at the earliest.

Thank you.

Regards,

[Name]

Python Developer

Instead of:

✗ “Actually what happened was...”

Use:

✓ “The API returns 404 error when invalid token is passed.”

👉 Use:

- Bullet points
- Error code
- Steps

Should explain in technical way, no need to explain in long paragraph

3. Bug report emails and issue tracking communication

Professional way of send bug report mail to the technical team

1 Subject Line

Example:

Subject: Bug Report – Login Page Error

2 Greeting

Hi Team,

3 Problem Description

Example:

We are facing an issue while logging into the application.

4 Steps to Reproduce

Example:

1. Open the login page
2. Enter username & password
3. Click login
4. Error message appears

5 Expected Result

Expected Result: User should log in successfully.

6 Actual Result

Actual Result: “Invalid Server Error” message appears.

Closing

Kindly check and resolve the issue at the earliest.

Thank you.

Regards,

Full Sample Mail

Subject: Bug Report – Payment Page Error

Hi Team,

We are facing an issue on the payment page.

Steps to reproduce:

1. Select product
2. Click “Buy Now”
3. Enter payment details
4. Click submit

Expected Result: Payment should be successful.

Actual Result: Page gets stuck and shows error message.

Kindly look into this issue and resolve it.

Thank you.

Regards,

name

Important Points

1. Don't use emotional words

(“This app is useless”)

2. do not blame

(“Developer side mistake”)

 should be clear and in technical way

✅ if you attached any screenshot means should mention in that mail

4.Status update and progress report emails

Manager want to know daily process, so status mail must be clear

Structure:

Completed

In Progress

Blocked (if any)

5.Code review feedback communication

“Do not show any Ego in code review. Tone is important”

❌ “Your code is wrong.”

✅ “We can optimise this logic using a different approach.”

Tone: Respectful tone.

6.Requesting help or clarification from team members

“Asking help is not a weakness, but should ask in professional way”

Example:

“I’m unable to understand the API response format. Could you please clarify?”

Teach them to use:

Could you please

Kindly clarify

May I know

7.Communicating with non-technical stakeholders

“most of the client will not be in technical background, so should tell the issue in simple way”

So:

❌ “Database indexing issue.”

✅ “System data processing is slow.”

Use simple words

8.Handling client communication professionally

Don't say:

"Testing team mistake."

Say:

"We are analysing the issue."

Professional + calm tone.

9. Writing escalation emails and incident reports

"In Serious issue can send escalation mail."

Must include:

Issue

Impact

Since when

Action taken

Should maintain Serious tone.

10. Following up on pending tasks or emails

"if no response means remain it in polite way."

Example:

"Just following up on my previous email."

Not:

"Why no response?"

11. Meeting summaries and action item emails

"professional sign to send MOM after the meetings ends ."

Discussion

Decision

Action Item

Deadline

12. Remote work communication etiquette

"WFH (work from home) candidates should be strong in communication."

- Reply time

- Proper subject
- Don't ignore mails

13. Using proper tone and avoiding misunderstandings

“ Do not use subject or body in ALL CAPS in mail which is not a proper tone.”

Explain emotional misunderstanding in email.

No sarcasm.

No one-word replies.

14. Attaching logs, screenshots, and documentation properly

“mention the attached file properly in mail .”

Say:

“Please find the attached file.”

Always check attachment before sending.

15. Security and confidentiality awareness in emails

“ Do not share Password, client data email to anybody”

Always double check recipient.

Especially Reply All.
